

AIRSPACE, AIRPORT, EXERCISE DESIGN

The services are delivered by Entry Point North simulator experts in close cooperation with a client to assure that all the local needs and specifics are accommodated. Professional expertise of designing and testing is provided for any new or modified:

- Airport layout, airspace layout
- Procedures such as SIDs, STARs etc.
- Inter-sector / Inter-unit cooperation between controllers
- Simulation exercises for Initial ATC Training, Transitional, Pre-OJT and Continuation Training (Refresher, Conversion)
- Combination of the above

For more information please contact our Sales department (see "Contact us for more information").
